

CLASSICAL STUDIES

OVERVIEW

In the classical studies courses, students learn about the enduring achievements and rich legacy of classical societies, exploring diverse aspects of life in the ancient world such as language, culture, commerce, social customs, and fields of intellectual inquiry. In addition to building proficiency in classical languages and knowledge of the classical world, an important aim of the courses offered in classical studies is to help students understand the world in which they live by making connections between the classical world and other ancient and modern societies, including their own society.

Courses in Classical Languages

The expectations for courses in Latin and ancient Greek are organized into four distinct but related strands:

- A. Oral Communication.** Students speak primarily in English in classical language courses, but they are required to read aloud words, phrases, sentences, and passages in the classical language. Students also give oral responses, in ancient Greek or Latin, to questions or instructions, and use the language in dialogues, skits, and other activities designed to consolidate their pronunciation and oral communication skills.

Students listen to words, phrases, and passages in the classical language in order to improve their understanding of ancient Greek or Latin. They are also expected to distinguish between classical and ecclesiastical pronunciation. Students listen in English to instructions, explanations of grammar, translations of passages being read aloud, lessons, discussions, presentations, and other oral texts. Through the understanding they gain during listening activities, students develop greater facility with the classical language and an appreciation of its connections to other languages and cultures.

- B. Reading.** Students read a variety of materials in English, including explanations of grammar, information about the ancient world, and research materials. Students also read passages in ancient Greek or Latin in order to improve their comprehension of the classical language and to develop their reading facility. In reading both English and ancient Greek or Latin, students use their critical thinking and analytical skills to develop proficiency in interpreting written text.

- C. Writing.** Students write a variety of texts in English, including translations of passages in the classical language, summaries, paraphrases, notes about grammar and information from lessons on the ancient world, research outlines, and jot notes for various purposes. In order to consolidate their knowledge and understanding of the vocabulary and grammar of the classical language, students compose phrases, sentences, and brief, simple paragraphs in Latin or ancient Greek. In addition, composition tasks in English extend students' skills in critical analysis to help them determine the most accurate and effective ways in which to express ideas.
- D. Intercultural Understanding.** Students apply their knowledge of vocabulary and grammatical concepts in the classical language to extend their understanding of English and other languages. In addition, they apply their critical thinking skills and knowledge of the ancient world, gained through classroom instruction, reading, and research, to evaluate the ways in which the classical language and culture have influenced the development of other languages and cultures. Through their study of a classical language, students build a sophisticated understanding and appreciation of the interconnectedness of peoples through history and around the world.

Language structures and conventions that are appropriate for each level are provided in the Language Knowledge charts for Latin and ancient Greek in the classical studies appendix. Students are expected to consolidate and refine the use of various grammatical elements and concepts as they complete language activities across all four strands.

The Grade 12 Classical Civilization Course

The classical world made profound contributions to civilization in such areas as literature, philosophy, politics, and the arts and architecture, and its influence continues to be felt in the modern world. In the Classical Civilization course, students explore a wide variety of media and classical works in translation to develop an understanding and appreciation of the myriad contributions of the classical world to other cultures and societies, including their own, and to make connections to their own experiences.

The expectations for this course are organized into five distinct but related strands:

- A. Critical Thinking and Literacy Skills.** The study of classical civilization requires students to comprehend a large volume of information through both class work and independent research, and to develop their ability to use and cite primary and secondary sources. Students read, summarize, paraphrase, analyse, interpret, and evaluate information from a wide variety of sources in order to explore the legacy of the classical world. Students work independently and collaboratively, selecting and using a variety of media to communicate information and ideas effectively in class discussions, seminars, presentations, research papers, and demonstrations, among other activities. Students make connections between the classical world, the world around them, and their own experiences, building a sophisticated understanding and appreciation of the interconnectedness of peoples through history and around the world.

- B. Mythology and Literature.** The study of mythology and literature is essential to understanding the classical world on its own terms and through its own words. Students explore various types of myths in order to gain insight into their influence on ancient and modern societies, including their own society. Students read translations of poetry, drama, letters, historical narratives, and speeches written by classical authors, all of which bring history to life by revealing the thoughts and feelings of real people in ancient Greece and the Roman Empire and which served as models for later writers. Because the study of mythology and literature cannot be separated from the study of classical languages, students learn to identify and use correctly some essential vocabulary and terminology derived from these languages, and acquire knowledge of the ancient Greek and Latin alphabets.
- C. History and Geography.** In this strand, students acquire and apply historical and geographical knowledge of the ancient Mediterranean to gain insight into the development of social customs and political and religious institutions in the classical world. Students investigate ways in which the political, military, and economic interactions of the peoples of the ancient Mediterranean played a key role in the cultural development of the region and ultimately of the later Western world. Because ancient Greek and Latin are used to refer to locations and events in the ancient world, students learn to identify and correctly use geographical and historical terminology derived from the classical languages.
- D. Philosophy and Religion.** In this strand, students investigate the schools of classical philosophy and the diverse religions of the Graeco-Roman world, acquiring an understanding of the contributions of philosophy to the development of modern scientific inquiry. Students also analyse ways in which classical philosophies and religions influenced other ancient societies and later cultures, including their own. Because the use of ancient Greek and Latin is inextricably linked to classical philosophical and religious writing, as well as to the development of modern Western thought and religious expression, students learn to identify and correctly use philosophical, scientific, and religious terminology derived from the classical languages.
- E. Material Culture.** The material culture of the classical world offers significant opportunities to gain insight into the lives of people who lived at that time. Students explore diverse aspects of the material culture of the ancient world – such as mosaics, frescoes, jewellery, coins, pottery, domestic articles, inscriptions on monuments, and architectural structures and sites – and examine issues related to the archaeological practices that have revealed this physical evidence. Students will develop an understanding and appreciation of the influence of classical material culture on other ancient and modern societies, including their own. Students also learn to identify the ancient Greek and Latin alphabets and acquire an understanding of basic epigraphy and terminology needed to interpret material evidence from the classical world.

A Core Concepts and Topics chart is provided in the classical studies appendix. The concepts and topics are balanced between ancient Greek and Roman culture and organized chronologically according to strand, and students are expected to demonstrate understanding of this information. A second chart, Key Terms, shows significant words used in connection with the course strands, as well as their origins in ancient Greek and Latin.

Classical Languages (Ancient Greek/Latin), Level 2

University Preparation

LVGCU/LVLCU

This course provides students with opportunities to continue their exploration of the achievements of the classical world through the study of Latin or ancient Greek. Students will expand their vocabulary and consolidate their knowledge of grammatical concepts by reading and translating moderately complex adapted selections in the classical language. English is the language of instruction, and students will further improve their ability to use their oral communication, reading, and writing skills in both English and the classical language. Students will also explore diverse aspects of classical culture, including science and technology, architecture, politics and military campaigns, geography and the environment, and religion, while developing their ability to think critically and to make connections across the curriculum between the classical world and the world around them.

Prerequisite: Classical Languages, Level 1, Academic

A. ORAL COMMUNICATION

OVERALL EXPECTATIONS

By the end of this course, students will:

- A1. Listening to Understand:** determine meaning in a variety of oral texts in the classical language and oral texts in English about the classical world, using a range of listening strategies;
- A2. Speaking to Communicate:** communicate information and ideas orally in the classical language and in English, using a range of speaking strategies and level-appropriate language suited to the purpose and audience (see the Language Knowledge chart for Latin or ancient Greek in Appendix A).

SPECIFIC EXPECTATIONS

A1. Listening to Understand

By the end of this course, students will:

A1.1 Using Listening Comprehension

Strategies: identify a range of listening comprehension strategies and use them before, during, and after listening to understand adapted oral texts in the classical language, including moderately complex texts, and oral texts in English about the classical world (e.g., *preview a vocabulary list before listening; listen for specific sound features such as intonation to aid comprehension; listen for noun and verb endings in the classical language to determine the meaning of sentences; make point-form notes of key information while listening to the classical language to use as a memory aid; use verbal cues to infer meaning while listening to a text read aloud; record and review oral texts to reinforce their familiarity with the pronunciation and improve listening comprehension; use their knowledge of derivatives to determine the meaning of new words in oral texts*)

A1.2 Understanding Linguistic Elements:

identify various elements of the classical language, including phonological and grammatical elements, and use the English terminology for those elements correctly (e.g., *define the distinctions between classical and ecclesiastical Latin pronunciation; distinguish between aspirated and unaspirated vowels and consonants in spoken ancient Greek; identify noun cases and explain how the cases contribute to the meaning of a sentence; identify the ablative absolute in Latin or the genitive absolute in ancient Greek while listening to a text read aloud; identify*

sentences using the optative mood in ancient Greek; describe the use of syntactic structures such as participial clauses and subordinate clauses within sentences and short oral texts; identify and explain the use of person, aspect, number, mood, and voice of verbs)

Teacher prompts: “What noun cases do you hear in these sentences?” “Raise your hand each time you hear a verb in the passive voice.”

A1.3 Demonstrating Understanding: demonstrate an understanding of the meaning of phrases, sentences, and adapted oral texts in the classical language, including moderately complex texts, and of oral texts in English about the classical world (e.g., *answer questions about daily life in the ancient world; paraphrase information presented orally; identify English words derived from the classical language*)

Teacher prompt: “What English words can you identify as derivatives of Latin/ancient Greek words in the text?”

A1.4 Metacognition:

(a) describe a range of strategies they found helpful before, during, and after listening;
(b) identify their areas of greater and lesser strength as listeners, and plan steps they can take to improve their listening skills (e.g., *plan to keep a journal of useful listening strategies for future reference; assess strategies suggested by the teacher and peers, and select some for use; during a student-teacher conference, explain how they self-monitor their listening skills; outline their learning process when they interpret a recorded oral text*)

A2. Speaking to Communicate

By the end of this course, students will:

A2.1 Using Speaking Strategies: identify a range of speaking strategies and use them to express themselves clearly and coherently in the classical language and in English for various purposes and to a variety of audiences (e.g., *adapt intonation, speaking pace, and mannerisms to role-play a significant individual from the classical world; prepare for a speaking activity by using a template to write a script; use costumes, props, or artefacts to enhance a presentation*)

A2.2 Speaking in the Classical Language: use level-appropriate vocabulary and grammatical constructions in a variety of oral language activities in the classical language, and speak with fluency and expression using standard pronunciation (e.g., *pose and answer simple questions; read a passage of adapted text aloud, using correct pronunciation and intonation, appropriate expression, and pauses for emphasis*)

Teacher prompts: “Where is Hercules?”/“Ubi est Hercules?” “Where is Theseus?”/“ποῦ ἐστὶν ὁ Θησεύς;” “Who is the hero?”/“Quis est heros?”/“τίς ἐστὶν ὁ ἥρως;”

A2.3 Speaking in English: use appropriate diction and correct grammar in a variety of oral language activities in English (e.g., *cite specific excerpts and use correct terminology when delivering presentations on classical texts or material culture; respond to questions about texts read in class, using English words that are derived from the classical language; perform skits based on cultural material; apply their knowledge of correct tense sequences gained from studying the classical language*)

A2.4 Translating: demonstrate knowledge of vocabulary and grammar by orally translating adapted texts, including moderately complex texts, from the classical language into English, with previous preparation and at sight

A2.5 Metacognition:

(a) describe a range of strategies they found helpful before, during, and after speaking;
(b) identify their areas of greater and lesser strength as speakers, and plan steps they can take to improve their speaking skills (e.g., *describe how the use of appropriate diction contributes to the effectiveness of their speech in both English and the classical language; use a graphic organizer to categorize the ways in which verbal and visual cues support and clarify their spoken messages; identify effective elements of their presentations that they could incorporate into future presentations; plan to use a checklist to monitor their contributions to discussions; describe the factors that improve their communication, such as familiarity with the topic, sufficient subject-specific vocabulary, and use of intonation and gestures*)

Teacher prompt: “What strategies can you use to expand your spoken vocabulary in the classical language?”

B. READING

OVERALL EXPECTATIONS

By the end of this course, students will:

- B1. Reading Comprehension:** determine meaning in a variety of texts about the classical world, in the classical language and in English, using a range of reading strategies;
- B2. Awareness of Cultural Context:** demonstrate an awareness of the cultural context of the classical language, using information from a variety of media in both the classical language and English.

SPECIFIC EXPECTATIONS

B1. Reading Comprehension

By the end of this course, students will:

B1.1 Using Reading Comprehension Strategies:

identify a range of reading comprehension strategies and use them before, during, and after reading to understand adapted texts, including moderately complex texts, in the classical language and texts in English about the classical world (e.g., *activate prior knowledge with an anticipation guide; predict possible outcomes, using knowledge of the topic of the text; skim text to identify unfamiliar words and new cultural content; use their knowledge of classical culture or stories they have previously encountered to make inferences while reading; use visual information from items of material culture, such as pottery, coins, frescoes, and mosaics, to help interpret text; make connections to other texts or to personal experiences; use their knowledge of derivatives and classical civilization to analyse new concepts when reading materials in English*)

Teacher prompts: “Judging from the outcome of the story you have just read in this series, how do you think the characters will react in the next story?” “What strategies can you use to identify the Latin/ancient Greek text that will complete this cloze passage?” “How can the content of stories that you have translated previously help you read this passage?”

B1.2 Understanding Linguistic Elements in the Classical Language:

identify various elements of the classical language, including grammatical constructions and relationships (e.g., *participial clauses; uses of the subjunctive mood in Latin; uses of deponent verbs in Latin;*

uses of the middle voice in ancient Greek verbs; the difference between the optative and subjunctive moods in ancient Greek) and modern conventions of the writing system (e.g., *the use of commas to set off appositives, phrases, and clauses and to clarify antecedents in relative clauses*), and demonstrate an understanding of their use

Teacher prompts: “How does the addition of a clause with a verb in the subjunctive mood help clarify the meaning of this sentence?”

“Try reading the sentence with and without commas. Why do you need commas to set off the appositive phrase?”

B1.3 Reading for Meaning in the Classical

Language: demonstrate an understanding of a variety of adapted texts, including moderately complex texts, in the classical language (e.g., *dialogues, brief plays or extracts from plays, inscriptions on monuments and coinage, epigrams*), using their knowledge of the classical language and information about the classical world (e.g., *identify and describe the key ideas in a short passage about a Roman military campaign in Britannia, drawing on their knowledge of the daily life of a Roman soldier*)

Teacher prompts: “How does what you already know about the duties and responsibilities of a Roman soldier affect your translation of this story?” “In what different ways can you translate the temporal clause ‘cum milites in via ambularent’? How does your decision affect your understanding of the meaning of the story?” “What name can you read on these ostraca? From your understanding of ancient Greek politics, what conclusions can you draw from the repetition of the name?”

B1.4 Developing Vocabulary: use a range of vocabulary-acquisition strategies before, during, and after reading texts in the classical language to determine the meaning of new words, and make connections to English words derived from the classical language (*e.g., use a reading response log to record and define new words and idiomatic expressions; use a Latin–English/English–Latin or an ancient Greek–English/English–ancient Greek dictionary to find the meaning of new words and phrases; use contextual and visual cues to infer the meaning of new words; use a graphic organizer of their choice to record English derivatives and their Latin or ancient Greek roots*)

Teacher prompt: “What useful words and phrases from the text you have just read could you include in a personal dictionary of Latin or ancient Greek?”

B2. Awareness of Cultural Context

By the end of this course, students will:

B2.1 Interpreting Information: make accurate inferences about the classical world, using information from a variety of sources and media (*e.g., English translations of inscriptions in the classical language; modern maps of the ancient Mediterranean; ancient coins; public notices and advertisements in the classical language; ostraca; biographies in English; translated letters of Cicero, Seneca, and Pliny; translated passages of Herodotus; ancient art forms such as relief sculptures and friezes*)

Teacher prompts: “What does the topography in this map of ancient Greece tell you about the Greeks’ ability to travel within their own country?” “Look at this public notice. What do you think it says, and who is the audience?” “What aspects of the Roman military conquest of Judaea are reflected in this relief taken from the Arch of Titus?” “Look at the figures of the Ionic frieze on the Temple of Athena Nike. What information about Greek mythology can you find?”

B2.2 Metacognition:

- (a) describe a range of strategies they found helpful before, during, and after reading to understand texts in both the classical language and English;
- (b) identify their areas of greater and lesser strength as readers, and plan steps they can take to improve their reading skills (*e.g., using a graphic organizer, categorize the strategies they regularly use at various stages of reading, and identify any gaps; compare and contrast their use of strategies for reading in English and for reading in the classical language; compare their most effective strategies for reading in the classical language with those of a peer and collaborate to describe the best use for each*)

Teacher prompts: “How does skimming a text for vocabulary and grammatical elements before reading it improve the accuracy of your translation? What other strategies do you use before reading?” “In what ways is reading a story in English different from reading a story in Latin/ancient Greek? How do these differences influence your use of comprehension strategies?”

C. WRITING

OVERALL EXPECTATIONS

By the end of this course, students will:

- C1. Translating from the Classical Language into English and Composing in the Classical Language:** translate texts from the classical language into English and write texts in the classical language, using appropriate vocabulary and language structures and correct grammar (see the Language Knowledge chart for Latin or ancient Greek in Appendix A);
- C2. Writing in English:** write a variety of English texts related to the classical language, using appropriate vocabulary and language structures and correctly applying knowledge of spelling, grammar, and punctuation conventions;
- C3. Using the Writing Process:** use the stages of the writing process – pre-writing, producing drafts, revising, editing, and publishing – to develop and organize content, clarify ideas and expression, correct errors, and present their work effectively.

SPECIFIC EXPECTATIONS

C1. Translating from the Classical Language into English and Composing in the Classical Language

By the end of this course, students will:

- C1.1 Translating:** write accurate English translations, correctly applying knowledge of vocabulary and grammar, of moderately complex adapted texts in the classical language (*e.g., translate passages containing sentences with subordinate clauses and participial phrases; write a translation of a sight passage*)

Teacher prompt: “What strategy would you use to identify and translate a participial phrase?”

- C1.2 Composing:** compose phrases, clauses, and sentences of moderate complexity and length in the classical language, using appropriate strategies and resources to ensure suitable word choice and correct word order and grammar (*e.g., complete cloze passages containing new language structures or elements; parse English phrases, clauses, and sentences to identify elements that govern decisions about grammar and word order in the classical language; identify phrases, clauses, and sentences in the classical language to use as models for their own compositions; consult print and electronic resources to verify word choice and grammatical concepts chosen; choose appropriate*

words when writing a brief passage, using running vocabularies, glossaries, and/or dictionaries; use grammatical charts to confirm the correct endings for nouns/adjectives and verbs)

Teacher prompts: “How would you parse the clause ‘when he was walking to the inn’?” “In the sentence ‘The citizens were filling the top rows of the theatre before the actors appeared on stage’, what case of the word *theatre* would you use in Latin/ancient Greek? Why?”

C2. Writing in English

By the end of this course, students will:

- C2.1 Writing in a Variety of Forms:** write a variety of English texts in response to passages in the classical language and to related cultural concepts (*e.g., a research report; an essay; a prose account of an event in the style of a passage from Julius Caesar’s Gallic Wars; a letter from a town council asking the emperor for money for a building project*)

Teacher prompt: “If you were the people of Aquae Sulis, what information would you include in a letter to Emperor Domitian asking for money for expanding the town’s bath complex? What stylistic elements do you think would be effective?”

C2.2 Demonstrating Knowledge of Content:

write in English to demonstrate an understanding of moderately complex adapted texts in the classical language (e.g., *write a paraphrase or summary of a text being read in class; write answers to comprehension questions about a text being studied; write an interpretation of the author's possible purpose and the intended audience for a text being studied*)

C2.3 Applying Language Knowledge:

correctly apply knowledge of vocabulary, language structures, and conventions of spelling, grammar, and punctuation when writing in English

C3. Using the Writing Process

By the end of this course, students will:

C3.1 Generating, Developing, and Organizing

Content: generate, develop, focus, and organize ideas for writing in both English and the classical language, using several appropriate pre-writing strategies and resources, during modelled, shared, guided, and independent writing activities (e.g., *identify the purpose and audience before writing, using guiding questions; consult reference materials to identify vocabulary related to their writing topic; use a T-chart to sort opposing points of view when developing an argument; gather supporting information, ideas, and opinions from print and electronic sources; share ideas with and seek feedback from peers; create a series of questions to guide research*)

C3.2 Drafting and Revising:

plan, produce, and revise drafts, using several strategies and resources and choosing forms and stylistic elements suited to the purpose and audience (e.g., *write captions for a graphic story, using the abbreviations and brief descriptions used in classical inscriptions as models; improve the logical order of ideas, and add clarifying information based on feedback from the teacher and peers; consult a revision checklist either independently or when in conference with the teacher; verify word choice, punctuation, and language conventions when editing their draft; correct errors and refine their language use, using relevant feedback from previous assignments*)

C3.3 Producing Finished Work:

produce a polished final product, using several strategies and resources to improve correctness and coherence and to enhance the readability and visual appeal of their work (e.g., *verify that vocabulary is appropriate and spelling and punctuation are correct, using a model generated by the teacher and students; incorporate labelled diagrams, illustrations, photographs, and/or pull quotes to highlight key information and enhance readability; add a sidebar with definitions of unfamiliar vocabulary*)

Teacher prompt: “What single Latin words would be most effective in a caption to accompany an illustration being used in your research paper?”

C3.4 Metacognition:

(a) describe a range of strategies they found helpful before, during, and after writing;
(b) identify their areas of greater and lesser strength as writers, and plan steps they can take to improve their writing skills in both the classical language and English (e.g., *identify the benefits of sharing ideas in pairs or small groups; identify specific skills, such as creating clear topic sentences and/or coherent paragraphs, that represent challenges or strengths in their own writing; describe the teacher and peer feedback that helped them identify the need for clarifying information and/or supporting details; plan to create a list of transition words and phrases that can be used to make logical connections between ideas; plan to maintain a personal vocabulary list to expand their repertoire of interesting, useful, or frequently forgotten words*)

Teacher prompts: “What strategies can you use to help you avoid repetitive phrasing in your writing?” “In addition to quotations, what types of information can you add to a text to substantiate and support your argument?” “How is paraphrasing as effective as using a direct quote to substantiate your argument?”

D. INTERCULTURAL UNDERSTANDING

OVERALL EXPECTATIONS

By the end of this course, students will:

- D1. Understanding the Influence of Classical Languages:** demonstrate an understanding of the influence of classical languages on the languages of other cultures;
- D2. Making Cultural Connections:** demonstrate an understanding of classical culture and its influence on other cultures.

SPECIFIC EXPECTATIONS

D1. Understanding the Influence of Classical Languages

By the end of this course, students will:

D1.1 Investigating Derivatives: identify a variety of words, phrases, and abbreviations that are derived from the classical language and found in English and other languages, and use them accurately (*e.g., create a glossary of English words relating to science, music, and/or the arts that are derived from a classical language; identify the use of Latin or ancient Greek in fields such as medicine and law; give the meaning of mottoes such as Canada's "A mari usque ad mare" and Ontario's "Ut inceptit fidelis sic permanet" and maxims such as "D. G. REGINA" on the obverse of Canadian coins and "Mens sana in corpore sano", and explain why Latin is still used in these contexts*)

D1.2 Using Interconnected Language

Knowledge: use knowledge of a variety of language structures that are common to the classical language, English, and other languages to enhance their speaking, reading, and writing skills in both English and the classical language (*e.g., the use of subordinate clauses in complex sentences; the formation and use of the comparative and superlative forms of adjectives and adverbs*)

D2. Making Cultural Connections

By the end of this course, students will:

D2.1 Understanding the Classical World: demonstrate knowledge and understanding of diverse aspects of life in the classical world, using several different strategies (*e.g., explain military strategies the Romans used in combat with ancient Mediterranean societies that engaged*

in guerrilla warfare, using a graphic or three-dimensional representation; outline mining techniques and/or agricultural practices used in the ancient Mediterranean world and describe their environmental impact; describe illustrations of the burial customs of different peoples in the classical world; describe the role of warfare in destroying arable land and polluting water supplies; identify and evaluate the influence of Roman imperialism on the development of trade and commerce in the classical world using maps; compare the empires of Alexander the Great and the Romans and their impact on indigenous peoples; create a list of the criteria for and benefits of Roman citizenship; explain how gender and class determined the roles of different groups of people, including slaves, in ancient Mediterranean societies; assess the impact of the Persian Wars on the growing power of Athens; compare Athenian and Spartan attitudes to education, citizenship, and warfare using a T-chart or a Venn diagram; assess the impact of the Peloponnesian War on the natural resources of ancient Greece; demonstrate Archimedes' principle using a three-dimensional model; use simulation software to show how an aqueduct delivered water; describe the journeys of a soldier throughout the Roman Empire as he might have written about them in a letter to his family; describe, using maps, the need for wood in daily life, the resulting deforestation, and its influence on the expansion of the Roman Empire)

D2.2 Making Cultural Connections: relate aspects of classical culture (*e.g., military practices, religious practices, social customs, technology, political ideas, scientific inquiry*) to comparable aspects of other societies and cultures (*e.g., identify similarities and differences between a Roman soldier's kit and a contemporary soldier's kit, and explain why they are different; identify a*

common classical religious practice that evolved into a non-religious custom in later society; compare ancient and modern weddings by recreating three elements of the bride's apparel in the classical world that are similar to or different from those of a modern bride; identify characteristic features of classical architecture in buildings in later societies; compare the organizational structures and/or the peacetime activities of ancient and modern armies; create a list of some classical contributions to engineering and science that are still relevant today; construct a T-chart comparing elements of classical and contemporary governmental systems, including First Nations governance structures; compare and contrast the information reported by Flavius Josephus in The Jewish War with news reports of modern conflict in the Middle East; compare waste and waste-management issues in the classical world to similar issues in the modern world)

Teacher prompts: “What are some religious and/or civic buildings of later periods that show the architectural influence of Greek and Roman temples, monuments, and other public buildings?” “What are some landmark contributions to the advancement of human knowledge that have been made by classical scientists and inventors?” “How did the system of Roman roads affect future settlement patterns in Britain and Europe?” “Does Flavius Josephus offer any advice about dealing with religious conflict that is relevant to modern governments?”

D2.3 Reflecting on Cultural Connections:

describe several ways in which their knowledge of the classical world relates to and/or enhances their understanding of other cultures, fields of study, and personal experiences (e.g., *explain how knowledge of the classical language supports their language learning in French, Italian, Spanish, and/or German; explain how knowledge of classical contributions to science relates to their learning in physics, mathematics, biology, and/or chemistry; use their knowledge of Roman history or Greek mythology to describe the influences of classical culture on the Hunger Games trilogy by Suzanne Collins; construct a T-chart comparing and contrasting the heroic quest of J. K. Rowling's Harry Potter to the quest of Heracles or of Theseus to illustrate how knowledge of classical literature can provide insight into contemporary literature*)

Teacher prompts: “Can you trace the etymology of ten French words derived from Latin?” “How does your knowledge of Greek mythology help you understand the nomenclature of chemical elements listed in the periodic table?” “In the Hunger Games trilogy, in what ways does Suzanne Collins draw on classical culture?”
